

Dear friends,
Emad Al-Rozzi

It is so painful to see the occupation flag today along Karl Johan gate, the main street in Oslo. It is so painful to see the occupation flag in the heart of Oslo while Norway in few days is celebrating 200 years for the constitution.

It is so painful to see the occupation flag while Norway is inviting a country that have no constitution yet, and they don't because they have a continuous dreams of expansion in the surrounding Arab land.

The snake of the Israeli occupation politics is visiting Norway, by an Official invitation from the Norwegian government.

Norway is inviting the responsible for weapons supply for the Hagana gangs since 1943, which was responsible of the murder of thousands and ethically cleansed 550 Palestinian Villages in 1948, and 700000 Palestinian people.

He worked in the occupation military between 1949- 1956. Shimon Peres said at the time, "in my opinion, everything was done according to clear logic and in a responsible way. I am a peace man"

He is the engineer of the Israeli Nuclear weapon program.

He is responsible for Qana massacre, when he bombed the united nation shelter, killing 102 women and children, and causing 400,000 Lebanese to flee their homes.

In Syria, he is the one that claims that Golan Heights are part of Israel because he claims that it was taken by war.

He is responsible for many war crimes, building settlements and colonies, murder of civilians, After he awarded the peace price, he also supported the atrocities in Lebanon in 2006. Peres is being responsible for the other war crimes, from building colonies on occupied Arab land to endorsing a policy of extra-judicial killings, which murders Palestinians and other Arabs without the benefit of a trial or, in fact, any proof other than that provided by the Israeli intelligence, the Shin Bet. He also supports the siege on Gaza, the destruction of its airport, and the elaborate system of checkpoints all across the West Bank.

He defends the demolition of Palestinian homes, and he justified the atrocities committed by the Israeli army in its recent war on Lebanon in 2006.

Israeli war criminals should be boycotted, not welcomed.
